MIDHUNGHOSH P A

Data Analyst

Kerala, India | +91 7293334646 | m4midhunghosh@gmail.com | linkedin.com/in/midhunghosh-p-a-107441371

PROFESSIONAL SUMMARY

Data Analyst with 8+ years of experience in banking, finance, and insurance, trained in Python, SQL/MySQL, Power BI, and Excel. Completed end-to-end analytics projects covering data cleaning, exploratory data analysis (EDA), feature engineering, KPI reporting, and dashboard development on real-world datasets. Brings strong business-operations and performance-reporting experience from managing a bank branch, combined with the technical skills to turn raw data into clear, actionable recommendations.

TECHNICAL SKILLS

Analytics & Visualization: Power BI, Microsoft Excel, Dashboard Development, KPI Reporting, Data Storytelling, Data Visualization

Programming & Databases: Python (Pandas, NumPy, Matplotlib, Seaborn, Plotly), SQL, MySQL (Joins, Aggregations, Subqueries)

Data Analysis: Data Cleaning, Exploratory Data Analysis (EDA), Data Transformation (Power Query), Feature Engineering, Outlier Detection, Correlation Analysis, Statistical Analysis

Tools: Jupyter Notebook, Google Colab, GitHub, Kaggle, Microsoft Office

Professional Skills: Analytical Thinking, Problem Solving, Communication, Leadership, Team Management, Customer Relationship Management

PROJECTS

India Gig Economy: Platform Workers Analysis 2026

Python, *Pandas*, *NumPy*, *Matplotlib*, *Seaborn*, *Plotly*, *Jupyter Notebook*

- Analyzed a 50,000-record survey of gig workers across 10 platforms, 17 states, and 29 cities to evaluate earnings, working conditions, and social-security gaps.
- Cleaned and validated the data (missing values, duplicates, data types, range checks) and used the IQR method to flag 0.77% extreme hourly-income outliers.
- Engineered 17 derived features, including monthly savings, take-home %, income per hour, and age/experience bands, expanding the dataset from 26 to 43 columns.
- Conducted univariate, bivariate, and multivariate EDA with 13 visualizations, including a correlation heatmap and pivot-table comparisons.
- Found a median monthly net income of ₹7,645, 68.8% of workers exceeding 8 hours/day, and a negative correlation (-0.37) between hours worked and hourly income.
- Identified that 70.3% of workers lack clear social-security coverage, take-home pay varies by 23 points across the top 10 states, and workers with vehicle loans save about 84% less each month (₹1,285 vs ₹8,037).
- Presented findings in a 20-slide deck with four recommendations: tenure-linked incentives, social-security enrollment support, vehicle-financing partnerships, and state-level policy review.

OTT Platforms Analysis Dashboard Power BI

Power BI, *Power Query*

- Built an interactive dashboard comparing content across Netflix, Amazon Prime Video, and Disney+ Hotstar.
- Cleaned and transformed OTT datasets using Power Query; analyzed content distribution, genres, ratings, and release trends.
- Designed slicers, filters, KPI cards, bar charts, and trend visuals that revealed content distribution patterns across platforms.

PROFESSIONAL EXPERIENCE

Branch Manager | CSB Bank 2020 – 2025

- Managed daily branch banking operations, customer relationships, and financial services delivery.
- Prepared business performance reports and operational analysis to support management decision-making.
- Led the branch team and tracked sales targets, improving customer service quality and operational efficiency.

Banking Professional | Ujjivan Small Finance Bank 2019 – 2020

- Managed customer accounts, documentation, and financial service operations.
- Assisted with branch reporting and customer relationship management, and supported branch sales and operations.

Financial Advisor / Sales Professional | HDFC Life 2016 – 2019

- Provided financial and insurance advisory services; analyzed customer requirements and recommended suitable products.
- Achieved sales and customer acquisition targets through relationship management.

CERTIFICATIONS

- **Data Analytics Certification, Entri Elevate** – Power BI, SQL, MySQL, Python, and Excel for business analytics, dashboards, EDA, and visualization.
- **Data Analytics Certificate, Illinois Institute of Technology (US)** – Analytics concepts, data handling, and visualization techniques.
- **Data Analytics Certification, National Skill Development Corporation (NSDC)** – Data Analytics domain.

EDUCATION

Master of Business Administration (MBA), Finance | Bharathiar University, India
Bachelor of Science (BSc), Mathematics | University of Calicut
